SUBJECT: Submittal of Land Treatment Plan for Petroleum Contaminated Soil From CFA
Tank Farm Pump Station - (OPE-EP-97-043)

Reference: Letter, Douglas M. Tanner to Robert A. Starck, Subject: Land-treatment of
Petroleum Contaminated Soil Exception to 1500 Cubic Yard Guideline, dated
November 6, 1996

Dear Mr. Tanner:

The reference letter granted the INEL an exemption to the fifteen hundred cubic yard guideline for land treating Petroleum Contaminated Soil (PCS). As a provision of granting the exemption, you requested that a treatment plan be submitted within forty-five days after the excavation of the contamination is complete. Lockheed Martin Idaho Technologies Company (LMITCO) completed excavation and backfilling for this project on December 24, 1996.

Enclosed is the Treatment Plan for land-treatment of PCS from the Central Facilities Area Tank Farm Pump Station (CFA-42) that was applied to the CFA Landfill Complex designated Landfarm Treatment Area in 1996.

If you have any questions, please contact me at (208) 526-1122.

Sincerely,

Robert A. Starck
